

DēLonghi Group

ABOUT US

World's leading producer operating in comfort living field (small kitchen and comfort appliances). Founded as a small industrial parts-making workshop in 1902, the company incorporated in 1950. In 2001 De'Longhi's acquired the British appliance maker Kenwood which expanded its reach in the food preparation and secured its position as the leader in the kitchen machine category. De'Longhi continued its expansion and in 2013 bought the rights to Braun household products from Procter & Gamble. In all, De'Longhi operates 5 production facilities and 33 international subsidiaries supporting sales to 75 countries worldwide, remaining committed to creating innovations that bring convenience and style into every customers' home making the everyday better.

OUR OPPORTUNITIES

In our Group we are developing a lot of areas among wich business intelligence, App development, robotic and industry 4.0. We are looking for people ready to improve theirselves, their career and to achieve the company goals. e-Services, IT Company of the De'Longhi Group, is looking for **Junior Analysts** that will work on projects and develop the SAP solution design through the company process analysis and the customization of the application field. In addition, e-Services is looking for **IT profiles** that will perform programming tasks in SAP or related to other projects development and implementation. We aim very high with the junior profiles, because we live in a dynamic environment and in continuous change and we believe in the learning by doing.
