

Moviri is a global software and professional services company providing 19 years of expertise in Analytics & Big Data, Machine Learning, Infrastructure Optimization, Capacity Management, Digital Optimization, DevOps, Cloud Engineering, Performance Management, Data Visualization, IoT Architecture, Security Intelligence, Security Governance, and Protection.

Moviri (formerly Neptun) is founded in 2000 by academic researchers and consultants specialized on IT Performance Optimization. Thanks to the initial sponsorship from the Politecnico di Milano and Bain & Co., Moviri assembled the first team of talented IT performance engineers.

From that moment the company started its growth at an impressive rate by expanding its service portfolio.

In 2006, Moviri, leveraging its expertise and technology, released **ContentWise**, an innovative content recommendation and discovery engine for IPTV and Digital Media operators. In 2014, Moviri released **Cleafy**, a cyber immune system solution that protects enterprise organizations and large websites from the most sophisticated and elusive internet threats.

In 2018, Moviri released **Akamas**, a machine learning self-driving solution that optimizes IT stack configurations, automatically and safely.

Now Moviri has its headquarter in Milan and offices in Boston, Los Angeles, New York, and Singapore. Moviri major references include [top companies](#) in different market segments such as telco, banking, insurance, energy, retail, and travel.
