# imaginining a more open educational approach to teaching and learning

**About the Workshop:** In this workshop Caroline Kuhn, Visiting Professor at the University of Padua, Department of Philosophy, Sociology, Pedagogy and Applied Psychology, will walk you through relevant ideas about open educational practices (OEP), what are them, and possible strategies to make them happen. The activity will show relevant examples that can serve as inspiration. Once the participants have covered that ground, they will be invited to do a practical exercise using the sundial of imagination illustrated below, that will boost participants' imaginative potential so that they can envision together a better future of open education in HE. Kuhn believes, indeed, that nurturing the educators' capacity to have a resilient and dynamic imagination is vital to achieving happiness and joy as key dimension of our curiosity. *These are to me the ultimate goals of education*, Kuhn emphasises.
